MANUKA HONEY 21 COMPLEX

**ACTIVE NEW ZEALAND
MANUKA HONEY 12+**

**21 BENEFICIAL ORGANIC
BOTANICAL INGREDIENTS**

BIOFLAVONOIDS

NO HARSH CHEMICALS

Phytonutrient dense skin repair with 12+ Manuka Honey

According to a 2013 review in the *Journal of Cosmetic Dermatology*, Manuka Honey is well documented to support a number of skin therapy applications. Rise Therapeutics' only selects active New Zealand Manuka Honey with a UMF (Unique Manuka Factor) number higher than 12+. This assures that both peroxide and non-peroxide antibacterial properties are present, as well as anti-fungal and anti-viral properties necessary to promote therapeutic benefits.

Manuka Honey 21 Complex is blended with active New Zealand 12+ Manuka honey and twenty-one additional active organic botanicals such as, aloe fillet gel, carrot, orange, avocado and pumpkin. The unique phytonutrient complex supports skin repair and promote skin health by providing a rich complex of essential vitamins (A, C, E & K) and minerals, antioxidants/bioflavonoids, beneficial amino acids and essential fatty acids (omega 3, 6 & 9).

No harsh chemicals or preservatives are ever used in our products.

(A) 12-year-old with forehead wound. She had scratched and removed scab. (B) Day 5 after application daily of Manuka Honey Complex 21. (C) Complete restoration of epidermis after two weeks

Skin repair, scar reduction and more

Manuka honey is made with pollen gathered from the flowers of the Manuka bush (a medicinal plant), and clinical trials have found this type of honey can effectively eradicate more than 250 clinical strains of bacteria, including resistant varieties such as:

MRSA (methicillin resistant *Staphylococcus aureus*)

MSSA (methicillin sensitive *Staphylococcus aureus*)

VRE (vancomycin-resistant enterococci)

Additional studies found that honey cured the intractable wounds of 59 patients, and it's been known to help heal everything from ulcers to sunburn.

3 Topical Application of Honey in Treatment of Abdominal Wound Disruption, Australian and New Zealand *Journal of Obstetrics and Gynaecology*

4 The Evidence Supporting the Use of Honey as a Wound Dressing, *International Journal of Lower Extremity Wounds*, 2006;5:40

5 Effectiveness of honey on *Staphylococcus aureus* and *Pseudomonas aeruginosa* biofilms, *Otolaryngology Head Neck Surgery*, July 2009;141(1):114-8

HOW TO APPLY:

Skin: Place a small amount in the palm of the hand and apply directly to affected skin areas. Safe for use after breastfeeding.

Hair: Place a small amount of cream in the palm of the hand and rub both hands together lightly coating your fingers and palm with cream. Run hands through dry damaged hair until you achieve desired smoothing. Can style as usual, or apply a heavier coating for overnight nourishment. Use cream lightly so hair does not appear greasy. Use as often as needed.

CARING NOTE:

Wash hands after use. Keep away from eyes. Not for consumption. This product is not a sunscreen, but is recommended for after the sun care.
