

VITANOX // CLINICAL USES & PEARLS

WHEN DO I USE THIS?

For anyone living in today's toxic world. We are exposed to more exogenous and endogenous toxins than ever before. The evidence implicating toxins in disease is accumulating at a rapid rate and important examples include the rising incidence of autoimmunity and endocrine disruption. Vitanox is THE herbal antioxidant (both lipid and aqueous). Turmeric, Rosemary and Green tea boost the very important Nrf2/ARE detoxification pathway and Grape Seed is rich in OPCs.

CONDITIONS THAT BENEFIT FROM VITANOX:

- POTENT ANTIOXIDANT & ANTI-INFLAMMATORY.
- INHIBITS VIRAL REPLICATION IN THE GUT.
- AUTOIMMUNE DISEASES.
- SKIN CHALLENGES: ACNE, PSORIASIS, EXCEMA.
- TO HELP BALANCE BOWEL FLORA: GRAPE SEED EXTRACT AND GREEN TEA ARE GASTROINTESTINAL ANTISEPTICS WHICH HELP TO RESTORE NORMAL BOWEL FLORA.
- MAY BE HELPFUL IN SUPPORTING NUMEROUS DEGENERATIVE CONDITIONS ASSOCIATED WITH AGING.
- PROTECTS AGAINST ENVIRONMENTAL TOXINS.
- VENOUS INSUFFICIENCY, VARICOSE VEINS, EDEMA.
- MALE AND FEMALE FERTILITY SUPPORT.
- STRENGTHENS AND SUPPORTS THE INTEGRITY OF CONNECTIVE TISSUE, BLOOD VESSELS AND CAPILLARIES.
- TO IMPROVE DAY AND NIGHT VISION, RETINAL DAMAGE AND DISEASE OF THE RETINA IN DIABETES.

DOSAGE

CHRONIC	MAINTENANCE
1 tablet 1 to 2 times daily	1 tablet daily

INGREDIENTS

Each tablet contains: Rosmainus officinalis (Rosemary) leaf, Camelia sinesis (Green Tea) leaf, Curcuma longa (Turmeric) rhizome, and Vitis vinifera (Grape) seed 1.0g.

DOCTOR COMMENTARY AND ANECDOTES

- ▶ Many women report marked improvement of their skin after being prescribed VitanoX. They say their skin has a sheen to it and looks more vital. VitanoX is helpful for all skin conditions.
- ▶ An 83 year old female patient diagnosed with angina 7 years previously and despite taking 5 different cardiovascular drugs, complained of breathlessness. She has experienced vast improvement whilst taking Hawthorn tablets and VitanoX tablets particularly with the breathlessness.
- ▶ Complex antioxidants are more beneficial than single antioxidants. Single antioxidants or a combination of single antioxidants have been found to not have the same health benefits as herbs. It is their chemical complexity that makes these antioxidants better.
- ▶ A practitioner always uses Silymarin tablets combined with VitanoX tablets in patients with liver damage. Once the liver has been strengthened LivCo tablets may be introduced (for liver detoxification) or Livton Complex tablets (for increased bile production) I prescribe this tablet a lot in cases of venous insufficiency and to improve microcirculation. It combines well with Horsechestnut Complex in these conditions. It helps to stabilize connective tissue and the procyanidins helps with the absorption of vitamin C, making it ideal for the treatment of connective tissue disorders, arthritis and wound healing.
- ▶ It helps in bowel flora protocols because Grape Seed and Green Tea support the growth of healthy bowel flora.

SYNERGISTIC PRODUCTS

VITANOX + GINKGO FORTE
OR BILBERRY

*for circulatory support and additional
antioxidant activity*

VITANOX + HAWTHORN

for general cardiovascular health
