To whom it may concern,

BPA (Bisphenol-A), and its replacement, BPS (Bisphenol-S), are chemicals used in the production of polycarbonate plastic. There are concerns regarding the safety of these chemicals.

Tri-Fortify™ Orange tubes are made of Low-Density Polyethylene (LDPE). LDPE does not contain BPA or BPS, and is in fact one of the most common plastics used in consumer food containers. LDPE is considered to be safe and does not contain any known harmful chemicals.

If you have any questions, please do not hesitate to contact Customer Service.
